

Away from the Studio - 2

Perceptor are a West End based marketing communications agency working with international consumer brands. Buckingham Vintners based in Slough, import and market new world wines to both independent and supermarket off-licenses.

Images were required for Buckingham Vintners new web site. Specifically feet and portraits of the Managing and Sales & Marketing Directors. As it is rare for everyone to be available at one time, I travelled to Slough with my location kit, not knowing what to expect as there had been no time (or budget) to recce the location.

Working closely with the Marketing Manager, we were able to shoot a selection of images that were composited during post-production, to achieve the desired result.

I strongly believe that working in partnership with clients is essential. My clients demand results - not excuses.
